

NIMISHA ANN MARIA

Kottayam, India | +91 7356265516 | nimishamaria3@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend focused software engineer with hands on experience building secure Java and Spring Boot applications, RESTful APIs, and relational database schemas. Specialized in JWT authenticated backend systems and integrating AI driven features (RAG pipelines, LLM APIs) into full stack platforms. Strong foundation in data structures, algorithms, and database design, seeking a Junior/Graduate Software Engineer role in Java full stack or backend development.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Backend: Spring Boot, REST API Design, FastAPI, Hibernate

Databases: PostgreSQL, MySQL, MongoDB

Frontend: React, HTML5, CSS3, JavaScript

Tools: Git, GitHub, Maven, IntelliJ IDEA, VS Code, GitHub Copilot

Concepts: OOP, RESTful API Design, JWT Authentication, Clean Architecture, Retrieval Augmented Generation (RAG), Data Structures and Algorithms

PROJECTS

AI Resume Analyzer [GitHub](#)

Java, Spring Boot, React, PostgreSQL, JWT, Maven, Apache PDFBox

- Designed and shipped a full stack resume analysis platform (Spring Boot and React) exposing 8 JWT secured REST endpoints across 5 controllers, enabling secure, multi user resume to job description matching.
- Built an automated PDF text extraction pipeline (Apache PDFBox) feeding a normalized PostgreSQL schema, eliminating manual data entry and keeping analysis records consistent and queryable.

AI Knowledge Assistant [GitHub](#)

Python, FastAPI, LangChain, ChromaDB, PostgreSQL, REST APIs

- Delivered an AI powered document Q&A assistant that ingests arbitrary documents and answers user queries in context, removing the need for manual document search.
- Implemented a full RAG pipeline (LangChain and ChromaDB) that grounds AI answers in retrieved content, improving answer relevance over plain LLM prompting.

EXPERIENCE

Java Full Stack Development Intern (Generative AI) | QIS Academy

Jul 2026 to Present

- Completing intensive hands on training in Java full stack development: Core Java, Spring Boot, Hibernate, REST APIs, React, and MySQL/MongoDB.
- Gaining practical exposure to Generative AI integration, including prompt engineering, OpenAI API integration, RAG concepts, and AI assisted development using GitHub Copilot.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.73/10

College of Engineering, Kidangoor, Kerala, India | 2022 to 2026

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object Oriented Programming

CERTIFICATIONS

- Intro to Machine Learning, Kaggle
- Java (Basic), HackerRank
